

Sulfur standards

Ensure the quality of your analysis

Do you use premium sulfur calibration standards for your petroleum analysis?

Our sulfur certified reference materials will help you ensure the reliability of your analytical results. We provide sulfur CRMs in various petroleum matrices for refinery laboratory analyses, QC processes and ultra-low-sulfur diesel (ULSD) analysis.

We offer the following premium VHG brand certified reference materials:

- Sulfur in light mineral oil
- Sulfur in light mineral oil (odour-free, made from polysulfide oil)
- Sulfur in diesel
- Sulfur in isooctane (for petrol analysis)
- Sulfur in heavy mineral oil
- Sulfur in biodiesel

VHG sulfur standards are prepared using high purity starting materials and are directly traceable to NIST sulfur SRMs. They are manufactured in an ISO 9001 and ISO Guide 34 facility, and certified in an ISO/IEC 17025 laboratory. These standards are suitable for ASTM D2622, D3120, D4045, D4294, D5453, D7039, D7212, D7220 and others.
