

# VHG Labs brand ICP-MS maintenance kit for cleaner cones & ion lenses

Cone maintenance and restoration improves analytical performance, reduces the time needed to tune and optimize, reduces interferences, and can result in substantial cost savings.

ICP-MS cones are exposed to sample by-products and high temperatures resulting in residue build-up. Ion lenses are similarly susceptible to residue build-up. We have assembled an ICP-MS maintenance kit designed to provide the ICP-MS analyst with the right tools to clean and restore cones to “as new” performance.

Our maintenance kit is designed for any brand or type of ICP-MS cone.

Reduce the time you spend cleaning cones and ion lenses, get better results and extend the life of your cones and ion lenses with this unique all-in-one kit.

## Kit includes:

- Abrasive paste compound
- Diamond abrasive lapping paper: coarse and fine
- Abrasive powder: coarse and fine
- Lint-free “clean-room” quality polyester cloths
- Polishing felt (3/8”)
- Wood-stick cotton swabs
- Pointed-tip plastic foam swabs
- Magnifier lens
- Instruction guide
